

Virtual proofing for colour & special finishes

PrintDevizor is ideal for...

graphic design

printers

labels

packaging

greetings cards

publishing

print finishers and suppliers

Reduce proofing costs

Explore creative options

Communicate complex print designs

PrintDevizor is a unique software tool for Mac and PC that gives you and your clients on-screen, moving, 3D views of your print designs under real-world lighting conditions.

See the effects of different papers, inks and finishes – even metallic and fluorescent inks, foils and embossing.

You get special finish colour libraries for QuarkXPress and Adobe Creative Suite so you can simply:

- design as usual in your favourite creative software
- choose special finishes from the PrintDevizor palette
- save as a PDF and then
- use PrintDevizor to automatically build your virtual proof

PrintDevizor standard edition is for everyone in design and print.

PrintDevizor Pro has extra features, essential for packaging, labels, greeting cards, publishing and print finishing.

Key features of version 2.2

- colour and appearance of process and spot colour inks on different papers
- special finish libraries for Creative Suite® and QuarkXPress®
- automatic building of virtual proofs from PDF files
- PANTONE MATCHING SYSTEM® including metallic and high intensity inks
- die cutting and transparent materials (Pro only)
- fold up or roll flat sheets to see final product appearance (Pro only)
- output snapshot images and QuickTime® movies
